

Africa Rising Cycling Center

## ARCC BIKE SHOP/GARAGE

*"We talk your bike's language"*

### Who we are

Africa Rising Cycling Center's bike shop was established back in 2014 with its primary mission and focus towards the National Cycling Team (Team Rwanda), however with increase in cycling clubs in Rwanda and a new wave of cycling enthusiasts, ARCC Bike Shop now offers retail sales of parts and accessories, clothing, and maintenance and repair service.

# Products & Services

## Products

### \*Bike Parts & Accessories

Generally, parts are installed during service [see below] and are an additional charge beyond the service fees. Some, like cranksets, pedals, tires, derailleurs or brakes, are both integral parts and upgrade accessories. Others, such as headsets, bottom brackets, spokes, chains, cables, and cable housings are strictly maintenance, though some will be sold to cyclists who prefer to work on their bikes themselves.

See (attached XL sheet) for Parts and prices for both MTB and Road bike; note that because of diversity of parts, ARCC bike shop is focused on Shimano and Sram components

We offer a variety of accessories. Headlights, helmets, water bottles, cycling jersey, cycling bibs, socks and Caps. It is not possible to carry every possible accessory, so we try to carefully choose those which will be most useful or desired by our target markets. When we receive special requests for a new item, we'll often order several to test the local demand, and if adequate, will add it to our regular stock.
